Hydraulic coupling removal Unit

- 3 interchangeable withdrawal plates to cover coupling range
- Extension adaptor piece required for coupling CTHC99

IMPORTANT
Loosen the shaft Nylock from coupling but leave on thread approx 3-5mm from coupling face. This will act as a safety stop when the coupling releases.

SAFETY NOTICE
BEFORE USE:
- Please read Enerpac instruction manuals:
  * L1608 Rev B 03/05  * L2255 Rev O 06/04  * L1763 Rev I 12/05
- Ensure withdrawal plate thread is fully engaged with the hydraulic unit threaded body
- Ensure all available bolt holes are used on the plate when removing a coupling so the force is distributed evenly.
